

## Product Game Rules

1. Player A puts a paper clip on a number in the factor list. Player A does not mark a square on the product grid because only one factor has been marked. It takes two factors to make a product.
2. Player B puts the other paper clip on any number in the factor list (including the same number marked by Player A). Player B then shades or covers the product of the two factors on the product grid.
3. Player A moves *either* paper clip to another number, leaving one in its original place and then shades or covers the new product.
4. Each player, in turn, moves a paper clip and marks a product. If a product is already marked, the player does not get a mark for that turn. The winner is the first player to mark four squares in a row—up and down, across, or diagonally.
