## Practice Test Answer and Alignment Document

Mathematics - Grade 6
Pencil-and-Paper

The following pages include the answer key for all machine-scored items, followed by the rubrics for the hand-scored items.

- The rubrics show sample student responses. Other valid methods for solving the problem can earn full credit unless a specific method is required by the item.
- In items where the scores are awarded for full and partial credit, the definition of partial credit will be confirmed during range-finding (reviewing sets of real student work).
- If students make a computation error, they can still earn points for reasoning or modeling.

## Unit 1

| I tem Number | Answer Key | Evidence <br> Statement <br> Key/ Content Scope |
| :---: | :---: | :---: |
| 1. | D | 6.RP. 1 |
| 2. | A | 6.NS.1-2 |
| 3. | -3.5 | 6.NS.6c-2 |
| 4. | 1.04 | 6.NS.3-4 |
| 5. | B, E | 6.EE.1-1 |
| 6. | 432 | 6.NS. 2 |
| 7. | B | 6.NS.7a |
| 8. | 16 | 6.NS.4-1 |
| 9. | B, D | 6.EE. 4 |
| 10. | 77.505 | 6.NS.3-1 |

| 11. | 5400 | 6. G.2-1 |
| :--- | :--- | :--- |
| 12. | -4 | 6. NS.6c-1 |
| 13. | D | 6. EE.6 |
| 14. | C | 6. SP.1 |
| 15. | C | 6. NS.1-2 |
| 16. | 22.31 | 6.1 nt.1 |
| 17. | C | 6. NS.6a |
| 18. | A | $6 . S P .3$ |

## Unit 2

| Item <br> Number | Evidence <br> Statement <br> Key/ Content <br> Scope |  |
| :---: | :--- | :--- |
| 19. | C | Answer Key |
| 20. | Part A: 24 <br> Part B: C | 6. G.1 |
| 21. | See rubric | 6. C.7/6.EE.4 |
| 22. | B | 6. EE.5-2 |
| 23. | 30 | 6. RP.3c-1 |
| 24. | See rubric | 6. D.3/6.RP.3 |
| 25. | 11 | 6. EE.2c-1 |
| 26. | Part A: 56 <br> Part B: 12 <br> Part C: 28 <br> Part D: 24 | 6. RP.3b |
| 27. | C | 6.RP.3d |
| 28. | See rubric | 6. C.5/6.NS.8 |
| 29. | Part A: D <br> Part B: D | 6. RP.3a |
|  |  |  |

## Unit 3

| I tem Number | Answer Key | Evidence Statement Key/ Content Scope |
| :---: | :---: | :---: |
| 30. | A | 6.EE. 6 |
| 31. | Part A: see rubric Part B: see rubric | 6.C.3/6.NS.1 |
| 32. | C, 1.60 | 6.EE. 7 |
| 33. | Part A: see rubric Part B: see rubric | $\begin{aligned} & \text { 6.D.2/5.NF. } 3 \& \\ & \text { 5.NF. } 6 \end{aligned}$ |
| 34. | $\begin{aligned} & \text { Part A: A } \\ & \text { Part B: A } \end{aligned}$ | 6.G.2-2 |
| 35. | Part A: see rubric Part B: see rubric | 6.C.9/5.MD. 5 |
| 36. | $\begin{aligned} & \text { Part A: } 90 \\ & \text { Part B: } 24 \end{aligned}$ | 6.RP.3c-2 |
| 37. | See rubric | $\begin{aligned} & \text { 6.D.1/6.RP. } 2 \& \\ & \text { 6.RP. } 3 \end{aligned}$ |
| 38. | $\begin{aligned} & \text { Part A: } 20 \\ & \text { Part B: } 4 \end{aligned}$ | 6.SP. 5 |

Rubrics start on the next page.

## Unit 2 \#21 Rubric

| Score | Description |
| :---: | :---: |
| 3 | Student response includes the following 3 elements. <br> - Explanation of why Brianna's thinking is incorrect <br> - Explanation of how to determine which expressions are equivalent <br> - Identifies expressions A and C as equivalent <br> Sample Student Response: <br> Brianna only checked the value of each expression for one substitution of $x$. To check which expressions are equivalent, I need to check that they are the same value for any substitution of $x$. Since expressions $A$ and $C$ are both equivalent to the expression $6 x-4$, they will be equivalent for any substitution of $x$, so they are equivalent. |
| 2 | Student response includes 2 of the 3 elements. |
| 1 | Student response includes 1 of the 3 elements. |
| 0 | Student response is incorrect or irrelevant. |

## Unit 2 \#24 Rubric

| Score | Description |
| :---: | :--- |
| $\mathbf{3}$ | Student response includes each of the following 3 elements. <br> - Valid estimate for the company's total sales in year 4 <br> - Valid explanation for determining the estimate |
|  | • Valid work to support the estimate |
| Sample Student Response: |  |
|  | I estimated the sales of yellow golf balls in year 4 to be about <br> 250,000 . Since the company expects sales to continue to increase <br> and the table shows sales increased by about 21,000 in year 2 and <br> by about 11,000 in year 3, I estimated an increase of about 15,000 <br> in year 4. Adding 237,000 + 15,000, I get 252,000 or about <br> 250,000 yellow golf balls sold in year 4. Next, I determined the <br> number of white golf balls sold in year 4 using the given ratio. Since <br> I estimated 250,000 yellow golf balls and the ratio of yellow to white |

|  | is $1: 5$, 1 multiplied $2,500 \times 5$ get $1,250,000$ white golf balls. <br> I added $250,000+1,250,000$ to get an estimate of 1.5 million golf balls sold in year 4. Next, I determined the number of boxes sold in year 4 to be 125,000 since $1,500,000 \div 12=125,000$. Finally, I came up with my estimate by multiplying the total number of boxes by $\$ 24$ per box (rounded up from $\$ 23.94$ ). So my estimate is $\$ 3$ million for year 4 since $125,000 \times 24=3,000,000$. <br> Notes: <br> - The student may receive a combined total of 2 points if the modeling process is correct, but the student makes one or more computational errors resulting in an incorrect answer. <br> - The student may receive a total of 1 point if he or she computes the correct answer, but shows no work or insufficient work to indicate a correct modeling process. |
| :---: | :---: |
| 2 | Student response includes 2 of the 3 elements. |
| 1 | Student response includes 1 of the 3 elements. |
| 0 | Student response is incorrect or irrelevant. |

## Unit 2 \#28 Rubric

| Score | Description |
| :---: | :---: |
| 4 | Student response includes each of the following 4 elements. <br> - Correct distance from point $P$ to point $\mathrm{Q}, 5$ <br> - Valid explanation for determining the distance from point $P$ to point Q <br> - Valid explanation for determining the value of $n$ <br> - Correct value for n, 5 <br> Sample Student Response: <br> The distance from point $P$ to point $Q$ is 5 units because point $P$ is 3 units above the $x$ axis. Point $Q$ is 2 units below the $x$ axis. So Point $Q$ is 5 units below point $P$, therefore the distance from point $P$ to point $R$ is also 5 units. Since $R$ is on the $y$ axis, it has an $x$ coordinate of 0 . So the $x$ coordinate of point $P$ is 5 units to the right and is 5 . <br> The value for n is 5 . |
| 3 | Student response includes 3 of the 4 elements. |
| 2 | Student response includes 2 of the 4 elements. |

| $\mathbf{1}$ | Student response includes 1 of the 4 elements. |
| :--- | :--- |
| $\mathbf{0}$ | Student response is incorrect or irrelevant. |

## Unit 3 \#31 Rubric Part A

| Score | Description |
| :---: | :---: |
| 2 | Student response includes each of the following 2 elements. <br> - Correct number of pieces, 6 <br> - Valid explanation <br> Sample Student Response: <br> The number line diagram shows segments marked that are spaced $\frac{1}{8}$ unit apart. I know James' board is $\frac{3}{4}$ foot long. I counted the number of $\frac{1}{8}$ units until I got to $\frac{3}{4}$ on the number line. There are 6 of these. So James can cut a total of 6 pieces from the board. |
| 1 | Student response includes 1 of the 2 elements. |
| 0 | Student response is incorrect or irrelevant. |
|  | Unit 3 \#31 Rubric Part B |
| Score | Description |
| 1 | Student response includes the following element. <br> - Correct Equation <br> Sample Student Response: $\frac{3}{4} \div \frac{1}{8}=6$ |
| 0 | Student response is incorrect or irrelevant. |

## Unit 3 \#33 Rubric Part A

## Score Description

2 Student response includes each of the following 2 elements.

- Correct number of cups of trail mix per hiker, $2 \frac{1}{3}$ cups
- Valid work or explanation shown

|  | Sample Student Response: <br> 8 bags of trail mix at $3 \frac{1}{2}$ cups per bag is $8\left(3 \frac{1}{2}\right)=\left(\frac{8}{1}\right)\left(\frac{7}{2}\right)=\frac{56}{2}=28$ cups. 28 cups divided among 12 hikers is $\frac{28}{12}=\frac{7}{3}=2 \frac{1}{3}$ cups of trail mix per hiker. |
| :---: | :---: |
| 1 | Student response includes 1 of the 2 elements. |
| 0 | Student response is incorrect or irrelevant. |
|  | Unit 3 \#33 Rubric Part B |
| Score | Description <br> Student response includes each of the following 4 elements. <br> - Correct number of miles hiked by each hiker, 7 miles <br> - Correct work shown or explanation given to determine the number of miles hiked by each hiker <br> - Correct total amount of water brought by each hiker, gallons <br> - Correct work shown or explanation given to determine the total amount of water brought by each hiker <br> Sample Student Response: <br> The distance to the scenic lookout: $\begin{aligned} 2+1 \frac{3}{4} & =\frac{8}{4}+\frac{7}{4} \\ & =\frac{15}{4} \end{aligned}$ <br> The distance back from the lookout is: $\begin{aligned} \frac{15}{4}-\frac{1}{2} & =\frac{15}{4}-\frac{2}{4} \\ & =\frac{13}{4} \end{aligned}$ <br> The total distance is: $\begin{aligned} \frac{15}{4}+\frac{13}{4} & =\frac{28}{4} \\ & =7 \end{aligned}$ <br> The total amount of water brought by each hiker is $\frac{1}{4}(7)=\frac{7}{4}=1 \frac{3}{4}$ gallons. |
| 3 | Student response includes 3 of the 4 elements. |
| 2 | Student response includes 2 of the 4 elements. |
| 1 | Student response includes 1 of the 4 elements. |

$\mathbf{0}$ Student response is incorrect or irrelevant.

## Unit 3 \#35 Rubric Part A

| Score | Description |
| :---: | :---: |
| 2 | Student response includes each of the following 2 elements. <br> - Explanation of why the student's reasoning is incorrect <br> - Corrected volume, 630 cubic inches <br> Sample Student Response: <br> The student's reasoning is incorrect because they did not count the top layer as part of the height. The calculation should have been $63 \times 10$, which equals a total of 630 cubes. Therefore, the volume is 630 cubic inches. |
| 1 | Student response includes 1 of the 2 elements. |
| 0 | Student response is incorrect or irrelevant. |
|  | Unit 3 \#35 Rubric Part B |
| Score | Description |
| 2 | Student response includes each of the following 2 elements. <br> - Correct explanation or work shown to find the height of the second box <br> - Correct height of the second box <br> Sample Student Response: <br> Volume is equal to the area of the base times the height. <br> $V=B h$ <br> $756=63 \times$ height of cubes <br> $\frac{756}{63}=$ height of cubes <br> 12 = height of cubes <br> So, the height of the box is 12 inches since there are 121 -inch cubes stacked on top of each other. |
| 1 | Student response includes 1 of the 2 elements. |
| 0 | Student response is incorrect or irrelevant. |

## Unit 3 \#37 Rubric

| Score | Description |
| :---: | :---: |
| 3 | Student response includes the following 3 elements. <br> - Correct total number of fish <br> - Correct ratio of small fish to large fish based on total number of fish <br> - Valid work shown or explanation given <br> Sample Student Response: <br> 5 small fish for every 10 gallons means 1 small fish for every 2 gallons. There are 200 gallons in the tank, so there will be 100 small fish. <br> 8 large fish for every 40 gallons means 1 large fish for every 5 gallons. There are 200 gallons in the tank, so there will be 40 large fish. $100+40=140 \text { total fish }$ <br> The ratio of small fish to large fish will be 100 to 40 or 5 to 2 . <br> Note: Any equivalent ratio is acceptable. Also, students may show or explain their work using other valid strategies, such as making a table of equivalent ratios. |
| 2 | Student response includes 2 of the 3 elements. |
| 1 | Student response includes 1 of the 3 elements. |
| 0 | Student response is incorrect or irrelevant. |
